

# ENVIRONMENTAL POLICY

Environmental considerations are integrated throughout all aspects of our business from supplier, manufacturing processes and finally to the customers installation.

As a responsible company, danfloor will conduct its business in a manner, which minimises the impact of its activities on the environment.

The purpose of this environmental policy is to clearly state our commitment and compliance principles. This structure enables effective communication and implementation of environmental initiatives.

- Comply with all applicable legal regulations in any location
- Environmental auditing to monitor progress and ensure compliance
- Continue to invest in environmental improvements
- Continuously improve environmental performance
- Continue to develop and market carpets with positive environmental properties, manufactured by processes that have the least environmental impact
- Minimise energy consumption
- Minimise waste generation from all sources and re-cycle materials
- Dispose of all waste by legal, safe and secure methods
- Continue to develop an open and effective relationship with regulatory authorities and the local community
- Control and minimise activities that impact upon the local community
- Ensure appropriate employee training and communication

This ensures our manufacturing operations adopt the "best available techniques" to minimise environmental impacts.
