In 2021, the Smart family, owners of The Dean Park Hotel, began a four-year project to transform and refurbish the hotel. Their plans included an extension for new bedrooms and ultimately introducing a state-of-the-art spa facility.

THE AIM

After retiring from owning and managing 12 care homes across Fife, Colin and Margaret Smart redirected their investment into The Dean Park Hotel, which they had purchased in 2019. Their vision for the refurbishment and redevelopment was to blend country house charm with modern, luxurious comfort, creating a true home-from-home experience.

As part of the project, additional bedrooms were added, and the hotel's interior underwent a complete redesign. Having previously worked with Danfloor during their time in the care sector, they once again turned to Danfloor to meet their carpeting needs.

THE SOLUTION

Danfloor recommended Scape and Glaze from the Evolution Collection as the ideal choice for carpeting the hotel's bedrooms, restaurant, bar, and function rooms used for weddings and conferences.

Throughout the refurbishment, over 2,500 square meters of carpet were supplied and expertly installed by Grande Construction, delivering a durable and stylish flooring solution that meets the demands of this busy hospitality venue.

THE OUTCOME

The overall refurbishment has resulted in a beautiful finish that continually receives positive feedback from those that visit and stay at the hotel.

The Evolution collection offers the hotel the following benefits:

- **Extreme durability** – The Evolution Collection boasts certification to British Standard classification 33, signifying its resilience for "Heavy Commercial Use." This accreditation ensures its capability to endure substantial foot and wheeled traffic, and rigorous commercial cleaning procedures.
- **Antimicrobial yarn treatment** – The Evolution Collections feature Bi-Ome®, an advanced permanent antimicrobial treatment specifically crafted to eliminate harmful bacteria, including those responsible for infections such as MRSA and C. Diff.
- **Spill safe** – All of the selected carpets have an integral protective impervious membrane, preventing liquid spills from penetrating through to the subfloor, reducing contamination, fungal growth, and unpleasant odours.
- **Naturally sound absorbent** – Danfloor carpets exhibit excellent sound absorption characteristics, surpassing a 28dB reduction in sound impact levels. This contributes to the establishment of a "therapeutic environment," fostering relaxation and effective communication for individuals within the space.
- **Appearance retention** – Crafted from solution-dyed Nylon the Evolution Collection presents a colourfast system that locks in vibrant hues. This ensures exceptional colour and light-fastness, maintaining the carpets brilliance even when exposed to rigorous cleaning chemicals.
